PROFILE

Software developer with 3+ years of experience building TypeScript and Node.js services for commerce and internal tools. Strongest in backend APIs, GraphQL, and data integrations, with hands-on React and Next.js experience and a background in business ownership.

EXPERIENCE

Lush Fresh Handmade Cosmetics North America — Intermediate Backend Engineer | May 2025 – Present

- Co-built the in-house backend for Lush Club, spanning Wallet funds and gift cards, Rewards points and offers, Events registration, and ongoing Spa booking work; the platform has contributed to significant global revenue growth.
- Led migration of a 23-subgraph federated GraphQL supergraph from Apollo to self-hosted Hive, updating entity resolution and deployment composition fallbacks; saved tens of thousands in Apollo fees.
- With two teammates, replaced the Talon One dependency for Lush Rewards with an in-house service in just over a month, saving six figures in annual vendor costs.

Lush Fresh Handmade Cosmetics North America — Junior Backend Engineer | Feb 2023 – May 2025

- Designed and implemented backend API infrastructure for an internal translation application used by staff.
- Delivered features across frontend, backend, and database layers within an Agile development team.

BrainStation — Software Engineering Teaching Assistant, part time | Jan 2023 - June 2025

- Mentored students on JavaScript, React, Node.js, Express, SQL, and full stack application development.

BluePhoenix Fitness — Founder | Apr 2018–Present

- Built and operated a digital coaching business, bringing product, customer, and commercial judgment to software work.

TECHNICAL SKILLS

Languages and frontend: TypeScript, JavaScript, React, Next.js, HTML, CSS

Backend and data: Node.js, Express, federated GraphQL, GraphQL Yoga, Pothos, Prisma, PostgreSQL, REST APIs

Tools and integrations: Git, pnpm, Vitest, Docker, Apollo, Hive, Saleor, Adyen, Typesense, Lokalise

AI-assisted development: Codex, Claude Code, OpenCode; reviewing and testing generated changes.

SELECTED PROJECT

Pet Care OS — Founder and Developer | 2026–Present

Designing and developing a mobile-first platform for independent pet-care businesses, focused on booking requests, scheduling, client and pet records, caregiver visits, and billing. Defined an Express/GraphQL/Pothos API architecture and guided request-to-schedule approval flow for initial pilots.

EDUCATION

BrainStation — Diploma, Software Engineering | 2022

Valley City State University — Bachelor of Science, Kinesiology | 2006
